Measuring Tenure Security: SDG Indicator 1.4.2 – Opportunities and Challenges

UCD UN Sustainable Development Goals (SDG)

Research Seminar Series

Dr Rónán McDermott, 12th February 2019

UCD School of Agriculture and Food Science

Centre for
Humanitarian Action

The urban challenge to the eradication of extreme poverty

Approx. **62%** of those living on less than **\$1.25 per day** will be living **in fragile states** by 2030.

Up to **325 million extremely poor** people are likely to be living **in the 49 most hazard prone countries** by 2030.

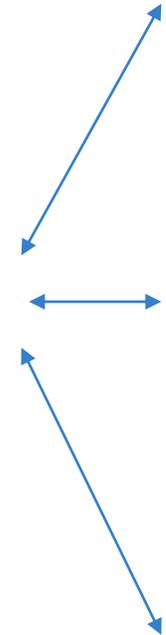

- Last forty years the urban population in lower income and fragile countries has increased by 326%
- Key driver of urban vulnerability and poverty: **tenure insecurity**

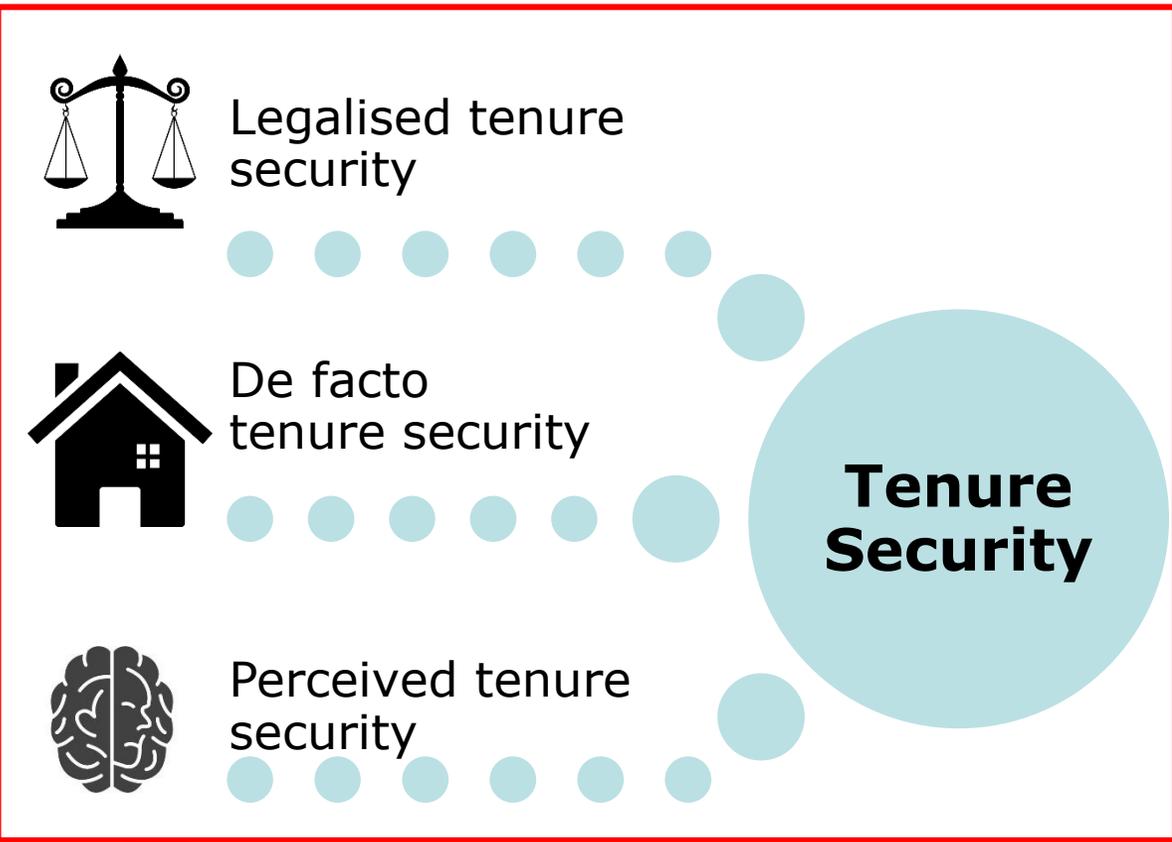

- **Target 1.4:** By 2030 ensure that all men and women, particularly the poor and the vulnerable, have equal rights to economic resources, as well as **access to basic services, ownership, and control over land and other forms of property**, inheritance, natural resources, appropriate new technology, and financial services including microfinance

- **Indicator 1.4.2:** Proportion of total adult population with:
 - 1) secure tenure rights to land,
 - 2) with legally recognized documentation; and
 - 3) who perceive their rights to land as secure, by sex and by type of tenure

Why does SDG1 focus on tenure security?

Indicator 1.4.2– moving towards SDG Tier 1 Indicator Status

Indicator 1.4.2

- Part (A):

$$\frac{\textit{People (Adult) with legally recognized documentation over land}}{\textit{Total adult population}} \times 100$$

- Part (B): $\frac{\textit{People (adult) who perceive their rights as secure}}{\textit{Total adult population}} \times 100$

Indicator Custodian Agencies:
UN Habitat & World Bank

Tier I	Tier II	Tier III
Conceptually clear	Conceptually clear	-
Established methodology and standards available	Established methodology and standards	NO established methodology and standards
Data regularly produced by countries	Data NOT regularly produced by countries	Methods / standards being developed and tested

Source: UN Habitat

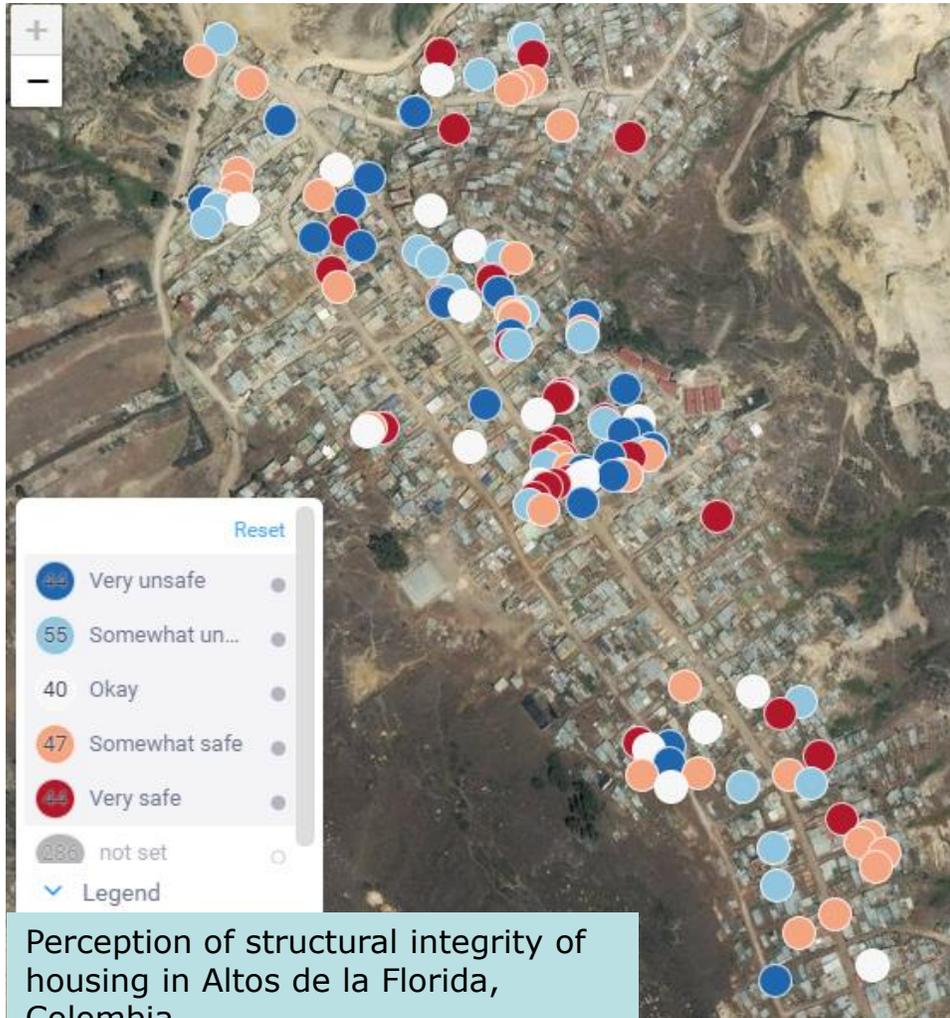

Relative consensus...:

- Tenure security a complex concept featuring the following dimensions:
 - *Legal dimension*
 - *Factual dimension*
 - *Perceived dimension*
- Strong relationship between tenure security and welfare outcomes (i.e. poverty reduction, access to resources, services..)
- Importance of gender disaggregated data

Altos de la Florida, Colombia

... but contestation & silence:

- How each of the dimensions of tenure security (legal, factual and cognitive) influence welfare outcomes
- Lack of sufficiently rich cross-national and intra-national comparative case studies
- Precision of indicators v understanding complex relationships between tenure security components themselves and between tenure security and other outcomes
- Tier 1 indicator and monitoring ought to be complemented by further in-depth studies
